

2 Chronicles

pg.

**25% of energy bill = phantom
power**

**If we all used energystar
appliances, it would be the
equivalent of taking 3 million
cars off the road**

**If every household in America
switched out one compact
fluorescent bulb it would
reduce energy consumption
as much as taking a million
cars off the road**

A ton of recycled paper saves:
17 trees
3 cubic yards of landfill space
7k gallons of water
4200 kw hours of energy
(that's enough to heat a home
for half a year)
390 gallons of oil
and it prevents 60 lbs of air
pollutants

**If our recycling rate increased
from 30% to 60% we would
save 315 million barrels of oil
in a year**

If every American's tires were properly inflated it would save more than 4 million gallons of gas a day
